Summary

Full-stack developer and Computer Science graduate (B.Tech CSE, 2026) with production experience as sole developer of two live client platforms processing 100+ orders/day combined (Next.js, TypeScript, Supabase/PostgreSQL). Strong CS fundamentals with 500+ DSA problems solved. AWS Certified Cloud Practitioner and Salesforce Agentforce Specialist with hands-on NLP/transformer experience. Available to join immediately in Hyderabad.

Technical Skills

Languages: TypeScript, JavaScript, Python, C++, Java, SQL

Frontend: Next.js 14/16 (App Router, Server Components), React, Tailwind CSS, Zustand, Framer Motion, PWA

Backend & Database: Node.js, PostgreSQL, Supabase (RLS, Auth, Storage), REST APIs, Server Actions, Zod, OAuth 2.0

Cloud & DevOps: AWS, Vercel, GitHub Actions CI/CD, Docker, Git, Vitest, Serverless, Web Push (VAPID), WhatsApp Business API

AI / NLP: HuggingFace Transformers, spaCy, Prompt Engineering, Pandas, NumPy

CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Compiler Design

Experience

Freelance Full-Stack Developer

Remote

Subhash Chand Multi-Speciality Hospital, Deoria

March 2026 - Present

Prabhu Dana Pani - Canteen Ordering & Operations Platform | *Next.js 14, React 18, TypeScript*

- Built a bilingual (English/Hindi) food-ordering platform serving 50+ orders/day across online, POS, and dine-in channels; designed a 40+ table PostgreSQL schema with Row-Level Security, 41 versioned migrations, server-side authoritative pricing, and a transition-gated order state machine.
- Delivered POS with split billing and KOT printing, live kitchen queue, and an 18-section admin portal (inventory, payroll, FSSAI reporting) with RBAC and TOTP 2FA; implemented Web Push (VAPID/PWA) and UPI payment flows.

Cascade & Coal - Laundry Management Platform | *Next.js 16, React 19, TypeScript*

- Built a laundry-operations platform (50+ orders/day, 30 screens across customer, staff-POS, and admin portals) with 3-tier authentication (Google OAuth + HMAC-signed sessions with brute-force lockouts), edge rate limiting, CSP/HSTS hardening, and India DPDP Act compliance (consent, data export, right-to-erasure).
- Shipped QR bag tags with in-browser camera scanning, weight-photo proof uploads, SLA tracking, and automated WhatsApp order notifications; established CI/CD (GitHub Actions, Vitest), health checks, and automated backups with zero-downtime Vercel deploys.

Technical Projects

Text Summarization with NLP - [GitHub](#) | *Python, HuggingFace Transformers, spaCy*

- Built an NLP pipeline generating concise summaries of long documents using extractive (spaCy) and abstractive (pretrained HuggingFace transformer) methods, with preprocessing and evaluation for coherence across varied document types.

Custom Pseudo-Code Compiler | *Python, SLY, Automata Theory*

- Built a compiler in Python (SLY) translating pseudocode into executable Python via lexical analysis (tokenization) and syntax analysis (parsing).

Education

Graphic Era Deemed to be University

Dehradun, India

Bachelor of Technology in Computer Science and Engineering; CGPA: 8.3

July 2022 - June 2026

Certifications & Achievements

Certifications: AWS Certified Cloud Practitioner · Salesforce Agentforce Specialist (agentic AI workflows).

Hackathons: 2nd Runner-Up, International Hackathon (500+ teams, IoT/C++ on ESP32) · Amazon HackOn National Finalist.

Problem Solving: 500+ DSA problems solved across LeetCode, Coding Ninjas & TUF.
